

Video: A BEAUTIFUL LIE

a) Prologue: What does the old Inuit insist on? What did he use to do as a child? Is it still possible? Why?

→ Fill the following table:

As a child	Now

→ Complete the following sentence:

If, people around the world in lowlands

→ What's the name of the problem mentioned? It's **G L W G**

b) The landscape: Tick the correct boxes:

The ice is really thick crackled cracked.

It is white with a lot of black and grey spots. So, it is sparkling rotten.

C) Symbols:

Symbol	Meaning
The burning match	
The fire	
The singer/drummer bending down	
The phoenix	
The polar bear	
The cross	

d) The epilogue:

What about the old Inuit's predictions? He was right wrong.

What can you say about Thirty Seconds To Mars? They are a c d band.

ACTIVITIES

1. WHAT WE CAN DO: Discuss whether you will carry out the following things to help slow down global warming in the next week (act now!). If you will not do these things, say why:

1. Walk instead of driving or taking public transport.
2. Use public transport instead of driving.
3. Start planning to replace some of your electricity supply with renewable energy, such as solar or wind power.
4. Use the lights in your house less.
5. Replace your refrigerator and other electrical appliances with more energy efficient ones.
6. Plant a tree in the forest.
7. Recycle everything you use.
8. Donate money to organizations pushing for controls on global warming.

2. Complete this news article with the words on the right:

Global warming IS human made

BNE: Findings from a new study _____ Friday proves that global warming is caused by human activity, and not by natural environmental factors. Researchers at the Scripps Institute of Oceanography have found _____ evidence of human-produced warming in the world's oceans that is likely to impact water resources in regions around the _____. This finding removes much of the uncertainty associated with _____ about global warming. Many world leaders have closed their ears to this fact so they don't have to limit their economic activity or introduce expensive pollution controls. This is one of the reasons America has not signed the Kyoto Treaty on climate change. The US government prefers to believe global warming is a natural _____, caused by volcanoes and solar energy. Professor Tim Barnett said, "This is perhaps the most compelling evidence yet that global warming is happening right now and it shows that we can successfully _____ its past and likely future evolution." Barnett says the results hold implications for millions of people in the near future. In the decades immediately ahead, the changes will be felt in regional water _____, including areas impacted by accelerated glacier melting in the South American Andes and in western China, putting millions of people at _____ without adequate summertime water. Perhaps now more countries will sign up to the Kyoto Protocol.

3. TRUE / FALSE?

1. Global warming is caused by human activity, not natural environmental factors. T/F
2. Global warming is not likely to impact water resources around the globe. T/F
3. Many world leaders have closed their ears to global warming. T/F
4. The US government doesn't want to introduce expensive pollution controls. T/F
5. Global warming is a natural phenomenon, caused by volcanoes and solar energy. T/F

6. Scientists can successfully simulate the likely future evolution of global warming. T/F
 7. Millions of people will be at risk of having inadequate water supplies. T/F
-

4. WARMING FUTURE: In pairs / groups, rank the following outcomes of global warming - most serious at the top. Polar bears and penguins will disappear

1. Winters will be 10 degrees colder.
2. Malaria will travel north, affecting northern Europe, North America, and northern Asia.
3. Cockroaches will start moving to northern Europe, North America, and northern Asia.
4. Africa will become hotter and suffer more droughts.
5. Typhoons and hurricanes will become more powerful.
6. Skin cancers will increase.
7. Many countries will have no drinking water.
8. Countries such as the Maldives, Holland and Bangladesh will disappear under water.
9. Wars will start between countries fighting over water
